# Full VoIP Solution

## For your small business

### RenegadePBX Mini

The RenegadePBX mini is a full featured IP PBX offering up to 100 extensions and 75 concurrent SIP packed into a 3.8lbs and 11in x 9in x 3in appliance and offers 2 Gigs of RAM and a 24 Gig Flash memory.

- Music on Hold
- Hold/Transfer
- Call Pickup
- Paging/Intercom
- Dial by Name Directory

### Grandstream GXP2140

The Grandstream GXP2140 is a 4-line enterprise VoIP phone with advanced functionalities and performance and features HD voice, dual Gigabit RJ45 ports and a 480x272 TFT color display.

- 4 Line appearances
- Support for G.722 HD Voice
- 4.3" (480x272) TFT Color LCD Display
- Dual Gigabit RJ45 Ports
- Built-in auto sensing IEEE 802.3 af Power over Ethernet

### Patton SmartNode SN5300 ESBR

The SN5300 provides IP routing, IP Security and SIP registrar to a single Integrated Access Device. The SN5300 easily connects to the IP-PBX and ITSP creating a single channel for voice, video and data.

- IP Routing
- QoS and Security
- SIP Registrar
- NO Transcoding
- SN5300 WEB Wizard makes installation faster and easier

### VoIP Supply PBX Provisioning

VoIP Supply Assist will configure the proper IP settings to match your network specifications, then we will setup your extension information, and make sure the PBX is ready to be put in your network and connect to your phones. In addition, we will configure up to 10 phones purchased with the PBX to match your provisioned extensions so you receive a system that is ready to be dropped into your network and connected to your phone service out of the box!
