## CAN I GET VOIP FROM MY INTERNET PROVIDER?

---

**Fiction #1:**  
All I need is an Internet connection for VoIP to work

---

**Fiction #2:**  
I have the Internet service already so it's easier to bundle through my existing Internet Provider.

---

**Fiction #3:**  
My Internet provider should know everything about VoIP.

---

You also need to consider the VoIP hardware, your calling habits, and more!

---

It's risky if your provider is not a VoIP expert! Make sure they are experienced and able to offer the best value solutions.

---

Your internet service provider provides the "Internet service", but that does not mean they are an expert in the VoIP industry
