Converting FreePBX Appliance to PBXact

Key Benefits to Converting

- PBXact – Commercial modules
- Software Assurance
- Secure Network

Steps to Convert

- You will first need to have made a purchase for the FreePBX to PBXact conversion for your FreePBX Appliance system from an Authorized Sangoma Distributor or Partner.

  ○ Once this purchase has been made and you have received confirmation that the order was processed you can proceed to the steps

SPECIAL NOTE

- The conversion process requires your FreePBX Appliance to be **on version 10.13.66-18** or newer or errors and failures will happen.

  ○ Review this wiki to verify your current version and update if need be before proceeding below. FreePBX-Distro-10.13.66

Steps to Convert

- SSH to your PBX and login with the root user and update the license file with the command below.

  ○ fwconsole sa a [PBXact deployment ID] (shown on your paid invoice)

```
[root@uc-85436011 ~]# fwconsole sa a
Updating license for 85436011
```

- The update process will install additional RPMs, and make the necessary changes to the GUI behind the scenes. The end result is a complete new PBXact system. This process takes about 3-4 minutes.

Steps to Convert

- When completed you can run the following End of Line testing and all checks should come back Passed. If you have any failed checks wait 5 minutes and run again. If you still have failed checks please open a support ticket here.

  ○ fwconsole sa eol
