

PBXACT SaaS

Deploy Your Own Cloud PBX Solutions Using Sangoma PBXact SaaS

PBXact SaaS (Software as a Service) is a customizable, turnkey software solution you host in your own datacenter or virtual environment to provide your customers with world-class unified communications telephony services. PBXact SaaS allows Sangoma authorized partners to offer affordable, pay-as-you-grow virtual PBX solutions, billed on a monthly, per-user basis, with minimal up-front investments. Rebranding/white-label options let you customize the user experience and reinforce your brand.

PBXact SaaS offers advanced features that are available on your customers' handsets, desktops, and mobile devices. Features include: Automatic Handset Provisioning, Auto Attendant, Voicemail to Email, Conference Rooms, Call Queues, Call Parking, Call Recording, Ring Groups, Paging, Fax, CRM integration, Mobile integration (Android or iOS), Softphone, and much more. Call Center option also available for customers with contact center needs.

Whether your company is an experienced premised-based PBX reseller looking to expand your offering to the cloud, or an incumbent service provider looking for an alternate hosted solution, PBXact SaaS offers a proven, robust, cost-effective solution. You sell the service, manage your datacenter and customer installations, and collect the revenue.

PBXact SaaS Features & Benefits

UNIFIED COMMUNICATIONS PLATFORM

PBXact SaaS is a true UC platform offering your customers flexible remote options, softphone, mobile integration, fax integration, and more.

PAY-AS-YOU-GROW FLEXIBILITY

Pay per month only for the total number of users on your system, with minimal capital costs. Easily add or remove clients and customize services as your customer base grows.

FLEXIBLE BILLING SYSTEM

Utilize your existing billing system, or integrate with commercially-available billing packages.

CONTROLLED UPDATES

Updates including critical security patches are automatically available - then you decide when to deploy them.

COMPLETE SOLUTION

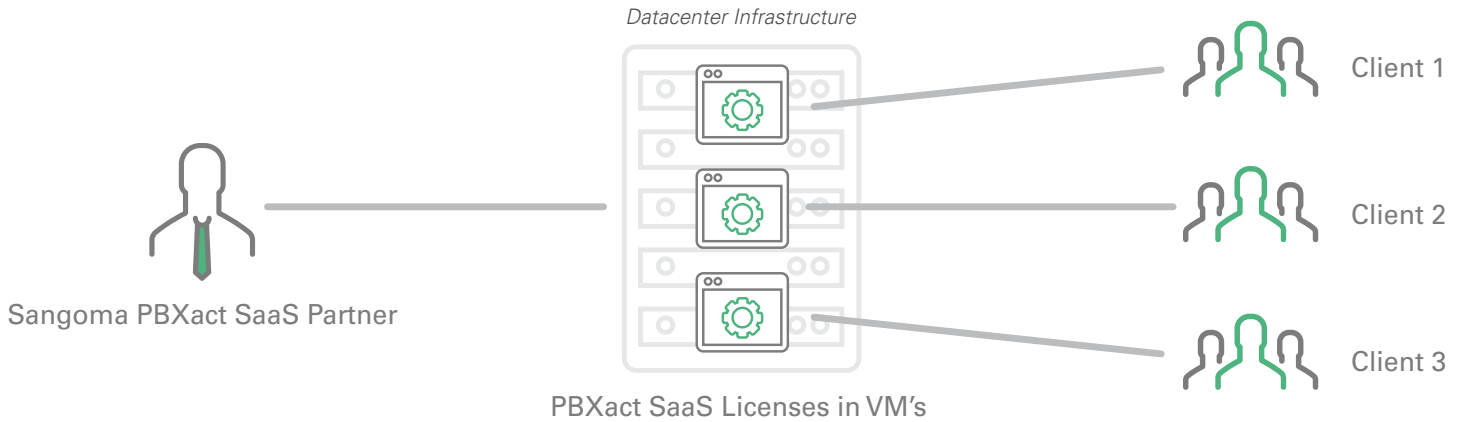

Sangoma provides a complete range of Gateways, Session Border Controllers and IP Phones to complete your offerings and infrastructure needs.

PROFESSIONAL SERVICES

Sangoma stands behind you for successful deployments and ongoing operations with its Up and Running and Annual Support packages

How it Works

Expand your offerings as an authorized Sangoma partner by becoming a PBX hosted provider today!

HOW DO I GET STARTED?

If you're an existing authorized Sangoma reseller or integrator, contact your account manager or visit <https://sangoma.com/pbxact-saas> to learn more about the PBXact SaaS program.

NOT YET A PARTNER? SIGN UP!

Apply online to realize the benefits of partnering with Sangoma and reselling our comprehensive line of hardware and software solutions <https://www.sangoma.com/partner-program/>

"In today's competitive phone market, PBXact SaaS gives you the edge to expand your customer base and increase loyalty and revenue, with minimal upfront costs. You can readily deploy customized, turnkey telephone systems with advanced features to your small-to-medium sized business customers, often at a fraction of the price of competing systems, providing a win-win for you and your customers!"

Combine Your PBXact SaaS Offering with Sangoma IP Phones!

Allow your customers to take advantage of automatic provisioning so their phones configure themselves as soon as they plug them in! Built-in "Phone Apps" letting users take control of the Phone's display to use your most popular features. No more feature codes to remember!

Best of all, you can order your customers' phones at the same time they purchase their PBXact services from you. This way you can have phones delivered to them pre-provisioned to work with their new setup.
