B250-XT Wireless Headset

Noise-canceling technology

When professional truck drivers first discovered the exceptional noise-canceling technology of BlueParrott® headsets, news of BlueParrott's sound quality spread rapidly. Incorporating Xtreme Noise Suppression™ technology, the B250-XT headset's advance noise-canceling microphone is designed specifically for use in high-noise environments.

Hands-free safety

The B250-XT enables you to talk on your cell phone and keep both hands on the wheel. Wireless Bluetooth® technology frees you from the entanglement of wires. Answer calls with a single touch of a button that is very easy to locate while you keep your eyes on the road.

Extended talk time

The B250-XT has an industry leading talk time of 16+ hours and a standby time of up to 150 hours so you can talk all day without having to recharge the headset.

Durable for life on the road

Lightweight and very comfortable, the B250-XT is durable enough to withstand life on the road. The stable over-the-head wearing style stays in place and the flexible "gooseneck" boom allows positioning of the microphone close to your mouth for superior voice quality.
