

ErisStation™ Conference Phone with Wireless Mics

A revolution in audio conferencing

Take your conference calls to a new level with VTech ErisStation. Unlike traditional conference phones, ErisStation allows everyone to spread out and stay engaged. Wireless microphones, cutting-edge sound quality and all-in-one design make it the ideal solution for every size conference room.

VTech Orbitlink Wireless Technology™

ErisStation features four, portable DECT 6.0 microphones with Orbitlink Wireless Technology, making conference calls more flexible and engaging than ever before. The microphones transmit multiple digital audio streams, which are synchronized to maximize pickup range in all directions. Meeting participants can spread out and speak without having to raise their voices, regardless of conference room size.

Integrated digital mixing technology delivers unified audio, giving callers on the other end a seamless experience and the impression that everyone's speaking into the same microphone.

Premium Sound Quality

Advanced audio features improve conferencing for both sides of the conversation. Acoustic echo cancellation enables full-duplex technology, which allows natural, two-way discussions to occur simultaneously—without audio clipping or fragmentation on either end. Automatic gain control (AGC) normalizes audio levels, so even soft speakers come through loud and clear.

The cabinet housing design and audio equalization capabilities have been carefully engineered to maximize sound levels and ensure superior performance.

Interference-Free Conferencing

There's no need to worry about background noise from computer fans, ventilation systems or light fixtures interfering with calls. Dynamic noise reduction (DNR) automatically eliminates distracting ambient noise for clear conversations that flow naturally. DECT 6.0 wireless technology in the microphones prevents interference from mobile phones and other wireless devices, enabling up to 8 hours of continuous talk time on each one.

Full of Features

Everything you need to get down to business and keep the conversation flowing.

- **DECT 6.0 technology:** Place the wireless microphones anywhere in a conference room and enjoy interference-free, high-quality sound.
- **Full room coverage:** Six microphones—four wireless and two fixed—maximize room coverage and participation.
- **Natural sound quality:** Thanks to features like full-duplex technology, digital mixing and audio equalization, nothing is lost in translation.
- **Charging built-in:** Magnetic charging bays in the base phone ensure the wireless microphones are always charged and ready.
- **Ample talk time:** With up to 8 hours of talk time on each wireless microphone, there's plenty of room for meetings that run over.
- **Two-year standard warranty:** Enjoy the peace of mind that comes with an industry-leading, standard two-year warranty.

Integrated Communications System

Compact, all-in-one design makes it easy to keep everything together—no clutter, no hassle. A built-in charging station with magnetic bays ensures the microphones are charged and available for the next meeting. The system is PBX compatible and comes with all the traditional phone features needed for productive calls, including a 50-name and –number phone book, 50-number caller ID log* and a large, backlit display for easy call handling.

ErisStation Conference Phone Features

Orbitlink Wireless Technology	Speed dial
Digital mixing technology	Redial/last number redial
Acoustic echo cancellation technology	Pre-dialing with editing
Automatic gain control	Mute on/off button: red LED on base unit and wireless microphones
Central, full-duplex speakerphone in base	Active call indicator: green LED on base unit and wireless microphones
Operable in small, medium and large rooms	50 CID log entry (type 1)*
2-line backlit display with date and time	50-name/number phone book entries
Built-in wireless microphone charging bays in base	Alpha phone book search
Connects to/supports one analog line; POTS interface	Number saving from CID log to phone book or speed dial
Includes 4 wireless and 2 fixed DECT 6.0 microphones	Enhanced noise reduction/Dynamic noise reduction (DNR)
Wireless microphone battery low indicator – flashing LED	Fast adaptive feedback control
Eco mode (talk mode)	Replacement microphone: VCS704-WM
Up to 70 hours standby time per wireless microphone	2-year standard warranty
Up to 8 hours talk time per wireless microphone	PBX/PSTN compatibility
10 ring tones/melodies; 6 ring levels	Wireless microphone auto power off; when base powered off
Volume control: 10 levels	10 speed dial entries
