

## IPVideoTalk Conferencing Service

The business world requires more mobility than ever before. Employees are always out of the office, businesses with multiple office locations have increased, and home/remote workers are more prominent than ever before. In order to succeed, businesses need a tool that allows them to keep their workforce connected, efficient and productive - no matter where they are. Enter Grandstream's IPVideoTalk service, a paid video, audio and web conferencing service that allows you to turn a video conference hosted on Grandstream's GVC3200 or GVC3202 into a comprehensive, online video meeting that can be joined from any other GVC3200/3202 and any Web-RTC capable browser. With IPVideoTalk, you can now hold meetings, video conferences or audio conferences that your team can join from wherever they are.

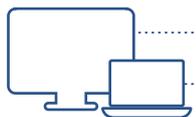

Full HD Video

Industry-leading 1080p Full HD to maximum quality and clarity

Conference Room Integration

Hold conferences on your GVC that can be joined by other GVCs and web users

Share a Screen

Present and collaborate with your team by sharing computer screens

Join From the Web in 1 click

Join meetings from Chrome or Firefox browsers with 1-click, no need to download software or plugins

Never Miss a Conference

Built-in scheduler to remind attendees and automatically call/ remind attendees at start time

HD Audio

Full high definition audio for all attendees to maximize quality and clarity

### Hold Meetings in 3 Simple Steps...

1 **Plan or Start a Meeting**  
using the online or GVC interface

2 **Invite Participants**  
using the online or GVC interface

3 **Meet and Collaborate**  
Meeting capacity based on host GVC
