RenegadePBX Pro

An open-source PBX, the RenegadePBX Pro by VoIP Supply features a robust base configuration as well as an extensive line of features and functions that will revolutionize the way that your company communicates. The RenegadePBX Pro has the ability to host any of the following platforms: 3CX, Elastix, AsteriskNOW, FreePBX, Ezuze Uniteme/SIPXCom, as well as Digium's Switchvox platform - allowing any business to utilize the software of their choice that will better suit their company needs or legacy system.

This model features no specific platform and specifically has been made unconfigured so that you have the choice to load the platform the best meets your companies needs on to the device. We do offer the RenegadePBX Pro pre-loaded with other solutions.

VoIP Supply stands behind the quality of the Renegade Pro PBX and has featured the following technology that makes this solution stand out amongst its competitors:
