

Bring Scalability to Cordless Communication DECT IP Phone W60 Package

The Yealink DECT IP Phone W60 Package enhances communication productivity for on-the-move employees in industries such as warehousing, catering and retail as well as in factory settings. Small yet powerful, the DECT base W60B has upgraded hardware for powerful features, reliability and scalability. The W60 Package is a bundle of W60B base and W56H handset, which delivers top-tier audio clarity and battery durability. The W60 Package is an ideal DECT phone solution for on-the-go communication.

Stronger Hardware, Greater Scalabilities

The Yealink W60B DECT base combines usability and scalability and features an upgraded chip for enhanced capabilities such as support for up to eight handsets, eight SIP accounts and eight concurrent voice calls. This powerful device allows for greater scalability for your voice collaboration.

Advanced Codecs and Excellent Reliability

- Upgraded hardware for the W60B translates into greater capability and improved stability. The W60B supports advanced codecs such as Opus and the AMR Codec. The Yealink W60 Package protects your investment returns, meeting current and future requirements.
- The W60 Package hardware is capable enough to enable a dual system. If software becomes corrupted during a failed upgrade (when power is cut inadvertently, for example), the W60B can automatically restart the upgrade when power is restored. Dual system, higher reliability.

Powerful Battery Solution Makes Communication Worry-Free

With an advanced Li-ion battery, the W60 Package boasts 30 hours of talk time and 16 days (400 hours) of standby time. This DECT phone gives businesses a worry-free solution thanks to its quick-charge technology and robust battery.
