Did you know?

SENTRY™
Transparent VoIP Security Platform

Toll fraud costs businesses over 4 Billion dollars a year. A single compromised system can easily rack up $50 - $100k in toll charges, in just a few hours. IP addresses in your ban list are often not a "problem solved" and even simple DDoS attacks can bring your PBX system down for hours.

Meet SENTRY

The security appliance, from the experts at SYSTM

- Small form factor, shelf-ready, security appliance
- Protects any on premise PBX that connects to the internet
- Installs "in line" with your PBX, in minutes
- Provides instant VoIP security
- Leverages SGDN, the SYSTM global emerging threat detection network
- Works without interrupting your current network configuration

Know SENTRY

- Easy Installation
  - Installs in less than 5 minutes
  - Zero network reconfiguration required
  - A true Plug and Play solution

- Enhanced Security
  - Makes IP PBX invisible to over 98% of SIP scanners immediately
  - Rate limits of SSH, SNMP, NTP, ICMP and SIP
  - Actively blocks malicious hackers via SGDN
  - Completely automated, requires no maintenance

- Simplified Support
  - Easy, central ticketing support
  - Lifetime hardware warranty
  - No need to configure – simply plug your new SENTRY into your network

- **Scanner Shield**
  - Block malicious scanners from finding your PBX
- **Active Guard**
  - Connects to SGDN for 24/7 updates to your SENTRY protection

Protect your VoIP infrastructure for about $2 a day!
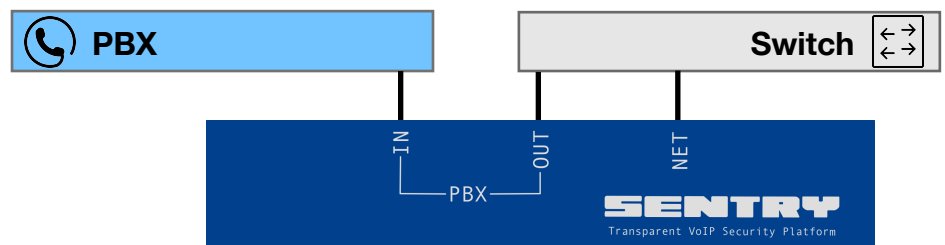

SENTRY is not a replacement for your firewall, but works as an additional layer of protection to reduce the likelihood of your PBX being attacked and preventing malicious hackers from finding you in the first place. Security best practices are still required within your PBX or designated voice network but with SENTRY on guard, you greatly reduce your exposure to help take full advantage of the many powerful business features and capabilities of your VoIP IP PBX system.
