Vandal-Proof Digital Door Station

The 3203 Vandal-Proof Digital Door Station is a rugged and tamperproof door station for use with Algo's 3400, 3226, 3228, and 8028 Doorphone systems.

A full duplex capable digital intercom with intelligent voice switching, the 3203 is designed for any environment where there is a high potential for attempted damage or abuse.

The 3203 includes a backlit push button and a switch input port with configurable operation. The station can be surface-mounted or flush-mounted using a standard recessed double gang electrical box or wall opening.

Features

➤ Tamper-proof security mounting screws (package includes special screwdriver)

➤ Solid milled aluminum anodized faceplate (resists dents, cigarette lighter burns, etc.)

➤ Backlit piezo switch allows low-profile visibility in dark environments

➤ No moving parts (switch reacts to touch by sensing capacitance)

➤ Offset grill pattern (can't poke speaker and microphone with a toothpick or sharp object)

➤ Weather and moisture resistant

➤ Rugged low-profile appearance dissuades vandalism
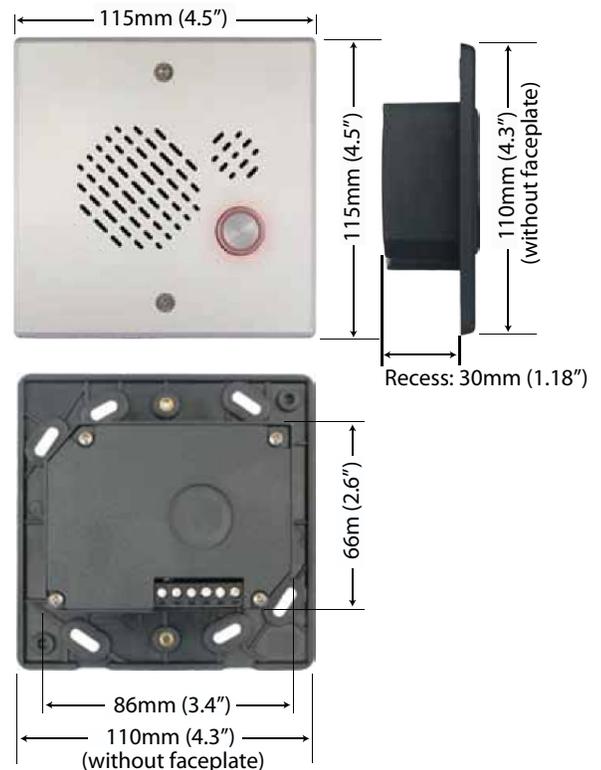

➤ Surface-mount bezel included

Applications

➤ Prisons & Correctional Facilities

➤ Police Stations

➤ Schools & Universities

➤ Security

➤ Government Buildings

➤ Public areas

➤ Underground parking lots
