Product name
VTech CareLine SN7014 Cordless Extension Ringer for VTech SN5127 & SN5147 Senior Phone Systems

Product description
The VTech CareLine SN7014 Cordless Extension Ringer is designed to increase the ring volume of your CareLine phone or doorbell (sold separately), or to be heard in rooms where there isn't a handset. Carry it with you, or rely on the extra-loud, up to 90-decibel sound to be loud enough you'll hear the phone ring even from the next room. A bright white LED on the cordless remote ringer flashes so know if a call is coming in or someone is at your door, just by looking at it. (Features require the VTech SN7021 Cordless Audio Doorbell to operate.)

Easily adjust the volume on the VTech CareLine SN7014 Cordless Extension Ringer to make it easy to hear. This accessory device is great for the hearing impaired or anyone looking for a senior-friendly phone system.

Keywords
vtech careline, phones for hearing impaired, amplified cordless phone, cordless phone for seniors, senior phone big buttons, landline phones for seniors, phones for elderly, large button phones, senior cordless phone, telephone for seniors, senior friendly phones
