

PA3

1) Port Definition

- ① Line in port: audio signal input, used to connect external audio input.
- ② Speaker port: according to the device input voltage adaptive output maximum power.
4Ω speaker, POE/10W, 12V/10W, 18V/20W, 24V/30W.
The greater the horn impedance, the smaller the output power.
Suggested wire diameter: 18AWG or larger diameter.
- ③ Line out port: audio signal output, for external headset or active speakers.
- ④ Microphone port: the proposed use of electret condenser microphone, sensitivity: -38dB, bias voltage 2.2V.
Microphone signal cable it is recommended to use a shielded cable and connect the shield cable to the grounding screw, improve anti-interference.
- ⑤ Volume decrease key: adjust ring volume / call volume / broadcast volume. Long press the volume down key to broadcast the IP address by voice.
- ⑥ Volume increase key: adjust ring volume / call volume / broadcast volume.
- ⑦ Network / Registration LED: indicates network status, call status, registration status.
Fast flashing: network anomaly or SIP account exception.
Slow flashing: during a call.
Always bright: successful registration.
- ⑧ Ethernet port: WAN port, standard RJ45 port, 10 / 100M adaptive, support PoE input. It is recommended to use five or super five network cable.
- ⑨ Power input port: 12V ~ 24V 2A input, according to the input voltage to determine the maximum output power amplifier.
- ⑩ USB port: connect the USB peripherals, such as USB flash disk, USB adapter, etc.
- ⑪ Function button port: connection the function button, you can make an emergency call through this button.
- ⑫ Reset key: press and hold for 3S, and the indicator light will turn off, and the device will restart and restore the factory settings.
- ⑬ TF card port: connection the TF card, used to store local audio files or records.

1. Installation

The first step: the device with metal strips (user-owned) fixed in the installation location.

The second step: connect the function key, speaker, microphone and other peripheral devices to the corresponding port.

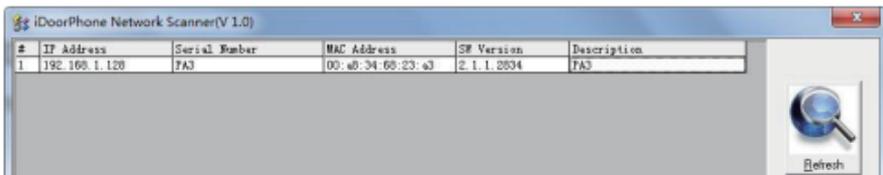

The third step: plug the network cable and power, the device light flashes on behalf of the power connection is normal.

2. Searching device

Method 1:

Download address: <http://download.fanvil.com/tool/iDoorPhoneNetworkScanner.exe>

Open the iDoorPhone Network Scanner. Press the Refresh button to search the device and find the IP address.

Method 2:

Connect the speaker, by pressing the volume down key for 3 seconds

(after 30 seconds after power on), the device automatically voice broadcast the machine's IP address.

Method 3:

Long press the volume up key for 3 seconds, the speaker issued a rapid beep, and then quickly press the Volume up key three times, beep stopped. Wait 10 seconds, successfully switch to dynamic IP after the system automatically voice broadcast IP address. Switching again will become a fixed IP address.

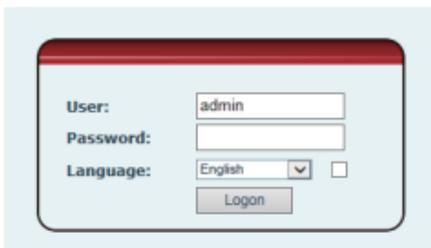

Default Setting			
Default DHCP Client	Enabled by default	Static IP address	192.168.1.128
Voice broadcast IP address	Hold the volume down key for 3 seconds	Default Web port	80

3. Fast settings

Step 1: Log in to the device page

Use the web browser input IP (for example: <http://192.168.1.128>) access.

The default user and password are admin.

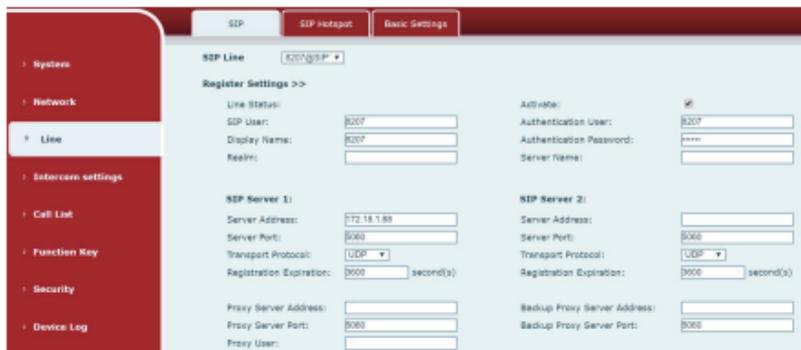

The screenshot shows a login form with the following fields and controls:

- User:
- Password:
- Language: (dropdown menu) and
- Logon:

Step 2: Set SIP account

Set SIP server address, port, user name, password and SIP user with assigned SIP account parameters.

Select "Activate", and then click [Apply] to save this setting.

The screenshot shows the SIP configuration page with the following sections and fields:

- Navigation tabs: SIP, SIP Hotspot, Basic Settings
- Left sidebar: System, Network, Line (selected), Intercom settings, Call List, Function Key, Security, Device Log
- SIP Line: (dropdown menu)
- Register Settings >>
 - Line Status:
 - SIP User:
 - Display Name:
 - Realm:
 - Authenticate:
 - Authentication User:
 - Authentication Password:
 - Server Name:
- SIP Server 1:
 - Server Address:
 - Server Port:
 - Transport Protocol: (dropdown menu)
 - Registration Expiration: second(s)
- SIP Server 2:
 - Server Address:
 - Server Port:
 - Transport Protocol: (dropdown menu)
 - Registration Expiration: second(s)
- Proxy Server Address:
- Proxy Server Port:
- Proxy User:
- Backup Proxy Server Address:
- Backup Proxy Server Port:

Step 3: Set the volume (if not connected can skip)

Intercom settings => Media Settings => Media Settings

Set the device volume size, as shown below, click [Apply].

Hands-free speakerphone volume setting: normal call speaker volume size.

Hands-free Mic Gain: microphone volume size.

Media Settings

Handset Volume: 8 [1-95]

Speakerphone Volume: 7 [1-95]

Speakerphone Ring Volume: 5 [0-95]

DTMF Playload Type: 321 [09-127]

Handset Mic Gain: 5 [1-95]

DTMF Playload Type: 327 [09-127]

SBC Playload Type: 67 [09-127]

Enable MNO: [Off]

Enable Line-in: [Auto]

Enable Line-out: [Auto]

Default Ring Tone: [1 Tone]

Handset Mic Gain: 5 [1-95]

DTMF Playload Rate: [095000]

SBC Playload Length: [20ms]

RTP Control Protocol(RTCP) Settings >>

RTP Settings >>

NOTE
Media settings, you can set the voice coding, volume, ringtone and so on.

Step 4: Set function key (if not connected can skip)

Set the function key as shown below for a quick start, click [Apply] to save this settings.

Type: Memory key

Number 1 (Value): the function key will dial to this number 1

Number 2 (Value 2): if number 1 is unavailable, it will be forwarded to number 2.

Subtype: speed dial

Line: working line

Function Key Settings

Key	Type	Name	Value	Value2	Subtype	Line	Media
DSS Key 1	Memory Key	Flugo	8287		Speed Dial	8287@SP1	[DEFAULT]
DSS Key 2	None				None	[AUTO]	[DEFAULT]

Apply

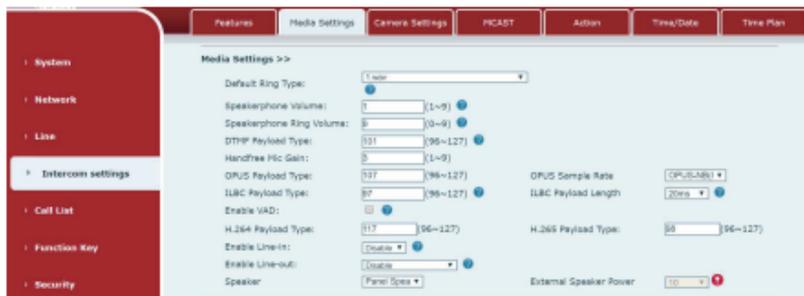

Programmable Key Settings >>

Advanced Settings >>

Step 5: Set speaker (Default Panel speaker mode)

Intercom settings => Media Settings => Speaker Settings

Default Panel speaker mode, It is the intercom panel terminal with shell, in order to ensure the speech effect and avoid damaging the speaker, the output power is limited to 10W.

If you need a high-power speaker for broadcasting, you can adjust it to the external speaker mode:

The 10W / 20W / 30W can be selected according to the power of the external horn.

But it is necessary to match the corresponding power adapter.

Power adapter	Output Power	Speaker spec
PoE	10W	10W/4Ω
12V/2A DC	10W	10W/4Ω
18V/2A DC	20W	20W/4Ω
24V/2A DC	30W	30W/4Ω
