

## Connecting and Sealing the SIP Large Button Outdoor Intercom

## Securing the Intercom

**Caution**  
**Equipment Hazard:** Do not use an electric or power screwdriver to fasten the face plate and PCB assembly to the gang box. To prevent over-torque damage to the gasket, do not apply more than 10 inch-pounds force. Over-torquing will cause the gasket to tear, risk moisture intrusion, and effectively void the manufacturer's warranty.

**Note:** To mount the intercom, use methods compliant with local electrical codes.

**Note:** More installation and mounting information is illustrated in the Operations Guide.

2-Gang box

Torx Key

Torx Screw

PCBA & Faceplate Assembly

Properly seal the intercom to prevent the accumulation of dust and moisture. Critical areas are shown in the image above: the conduit hole, all screw holes and an application of sealant around the perimeter.

# SIP Large Button Outdoor Intercom

SIP Compliant

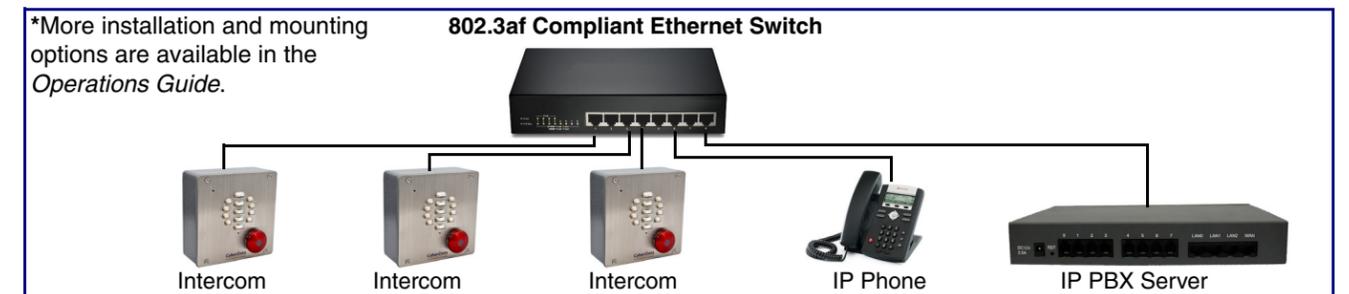

011567

Parameter	Factory Default Setting
IP Addressing	DHCP
IP Address <sup>a</sup>	192.168.1.23
Web Access Username	admin
Web Access Password	admin
Subnet Mask <sup>a</sup>	255.255.255.0
Default Gateway <sup>a</sup>	192.168.1.1

a. Default if there is not a DHCP server present.

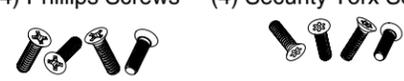

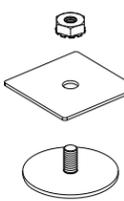

## Typical System Installation

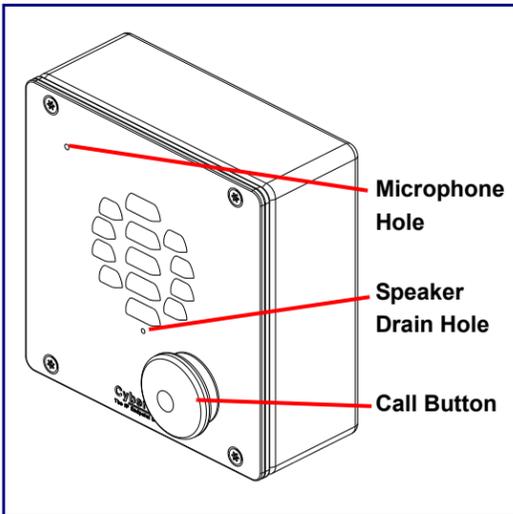

## Getting Started

- Download the *Operations Guide* PDF file, from the **Downloads** tab at the following webpage:  
<https://www.cyberdata.net/products/011567>
- Create a plan for the locations of your Intercoms.
- **WARNING:** This product should be installed by a licensed electrician according to all local electrical and building codes.
- **WARNING:** To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.
- **WARNING:** The PoE connector is intended for intra-building connections only and does not route to the outside plant.
- **WARNING:** This enclosure is not rated for any AC voltages!
- **WARNING:** Failure to properly seal intercom can compromise the IP rating. Should the product be exposed to water damage, it will be treated as an out of warranty scenario due to improper installation.

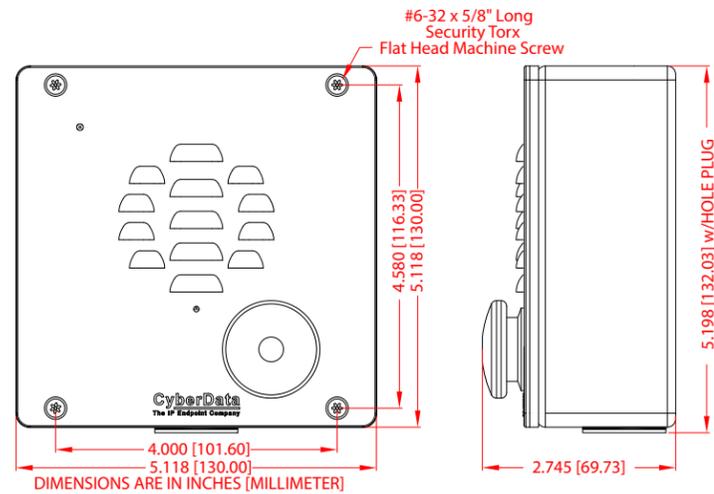

## Parts

<p><b>Accessory Kit</b></p> <p>(4) Phillips Screws    (4) Security Torx Screws</p>  <p style="text-align: center;">Mounting Component Security Torx Key</p> 	<p><b>Optional Accessories (for gooseneck mounting)</b></p> <p>(4) Carriage bolt nuts</p>  <p>(4) Carriage bolts</p>  <p>(4) Carriage bolt washers</p> 	<p><b>Optional Accessories</b></p> <p>(1) 531085* Hole plug assembly</p> 	<p><b>Sold Separately</b></p> <p>(1) 1/2-inch EMT compression connector with extra sealing locknut</p>

## Features

## Dimensions (Front and Side View)

## Dimensions (Rear View and Mounting Holes)

## Terminal Block Connections

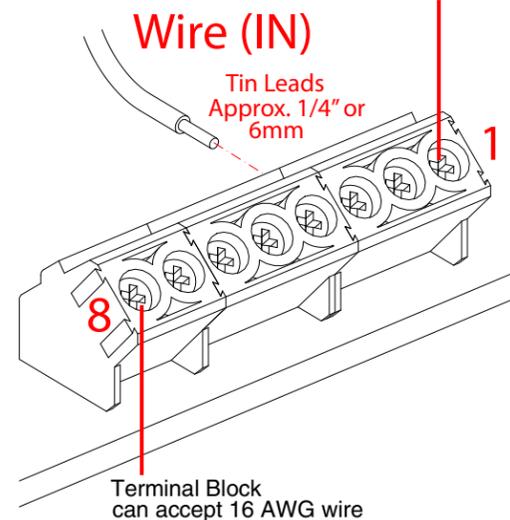

Alternate Power Input:  
 1 = +8 to +12VDC @ 1000mA Regulated Power Supply\*  
 2 = Power Ground\*

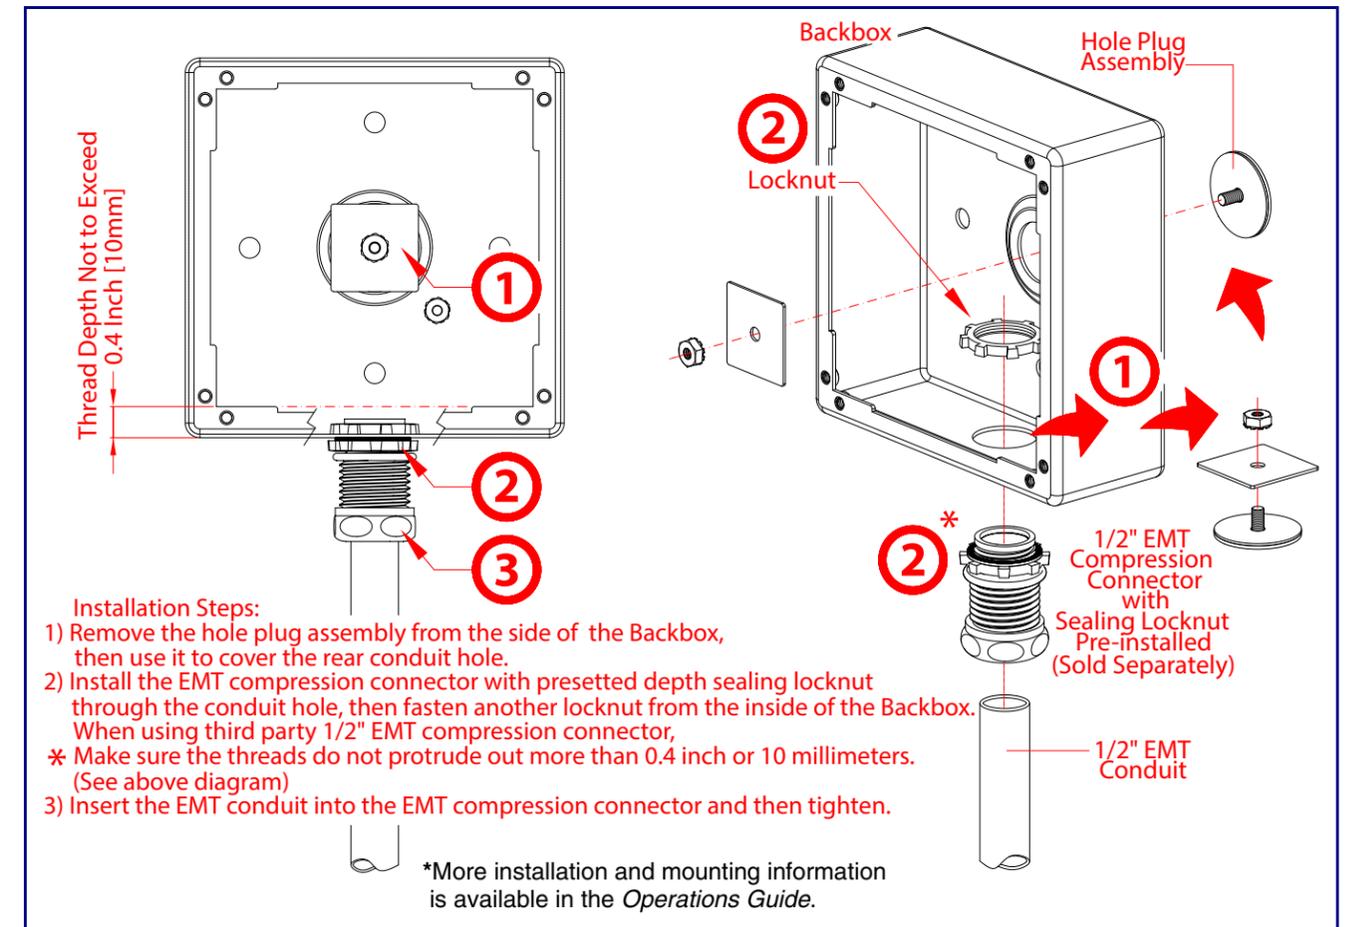

Relay Contact:  
 (1 A at 30 VDC for continuous loads)  
 3 = Relay Common  
 4 = Relay Normally Open Contact  
 5 = Sense Input  
 6 = Sense Ground  
 7 = Remote Switch "A"  
 8 = Remote Switch "B"

\*Contacts 1 and 2 on the terminal block are only for powering the device from a non-PoE 12VDC power source as an alternative to Network PoE power. Use of these contacts for any other purpose will damage the device and void the product warranty.

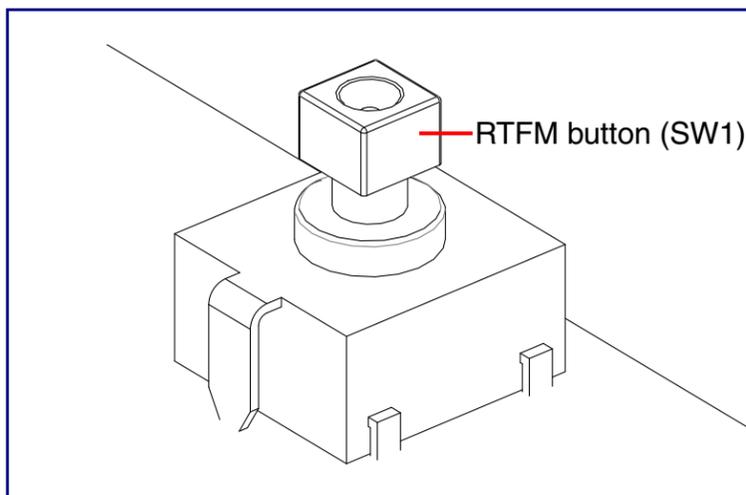

Use a 3.17 mm (1/8-inch) flat blade screwdriver for the terminal block screws

## Side Conduit Mounting Restrictions

## RTFM Button

When the device is operational and linked to a network, you can use the Reset Test Function Management (RTFM) button (SW1 [see picture]) to announce the device's IP address or restore the device to the factory default settings.

To announce the device's current IP address:

- Press and release the RTFM button within a five second window.

**Note** The device will use DHCP to obtain the new IP address (DHCP-assigned address or default to IPv4 Link Local if a DHCP server is not present).

To restore the device to factory default settings:

- Press and hold the RTFM button for longer than five seconds until you hear the device announce that it is restoring the factory default settings.
